The 2016 GSX-S750 provides a striking combination of unique styling and proven performance. One look at its chiseled headlight, fuel tank and tail section and you know this is a bike like no other. Its 750cc fuel-injected inline four-cylinder engine has been engineered to produce strong low-end torque and mid-range power for exceptional acceleration, while its inverted fork and combination cradle-tube & twin-spar frame rewards you with precise handling.

GSX-S750 FEATURES

- Powerful 749cc 4-cylinder fuel-injected engine is tuned to deliver a dynamic wave of smooth torque and strong acceleration.
- Throttle bodies with Suzuki Dual Throttle Valve (SDTV) system contribute to better throttle response and torque at the low-to-mid RPM range, while still producing peak performance.
- Automatic Idle Speed Control (ISC) improves cold starting and stabilizes the engine idle.
- Suzuki Exhaust Tuning (SET) servo-controlled butterfly valve helps enhance torque, response and acceleration, especially at low-to-mid rpm range.
- State-of-the-art transistorized digital ignition system contributes to a more complete combustion by igniting the mixture at the precise instant.
- Iridium type spark plugs provide a more condensed and hotter spark yet last longer than convention plugs.
- Effective engine management, emission control systems, and Suzuki Pulsed-secondary AIR-injection (PAIR) system that injects fresh air into the exhaust ports, allow the GSX-S750 to meet the latest emission standards.
- Frame design combines the advantages of a compact tubular-style street bike frame and a twin-spar sportbike frame to deliver a dynamic ride. A reasonable sport riding position is created by a carefully crafted relationship between the handlebars, footrests and seat.
- Dual front brakes with fully-floating 310mm discs and dual-piston calipers and a 240mm rear disc brake with single-piston caliper helps make sure you can have controlled stops.
- Inverted KYB forks feature a design developed in racing and are essential for a serious, high-performance machine.
- Link-type rear suspension, with a single shock absorber working through a progressive linkage, has 7-way adjustable spring preload.
- Carefully sculpted aggressive front bodywork and side panels make a brash statement about the bike's ability. Further cues to its performance potential are in the vented front fender, molded mirrors, chiseled fuel tank, and textured tank side panels.
- Distinctively shaped headlight cowl contains a bright 60/55W halogen bulb and integrated dual position lights. The angular tail section houses an integrated LED taillight.
- A compartment underneath the removable passenger seat can be used to store small items.
- Brightness-controllable instrument cluster, featuring a prominent analog tachometer and a large, digital LCD speedometer readout. The LCD display also includes a gear-position indicator, coolant temperature gauge, fuel gauge, selectable odometer/dual-tripmeter/ fuel consumption meter and a clock.
- A variety of Genuine Suzuki Accessories for GSX-S owners are available including a large selection of Suzuki logo apparel.
- 12-month limited warranty
