

SUZUKI

GW250

2017

Big bike looks with modern style

248cc twin sips fuel, but brings performance

Telescopic fork and rear mono-shock

Ergonomically sound riding position

Contoured seat has a low height

GW250 COLORS

Pearl Nebular Black

The Suzuki GW250 is an intelligent motorcycle in a class of its own. When you wonder if a motorcycle exists with electrifying style and affordability, wonder no more because the GW250 has arrived. It generates lightning fast low-end and mid-range power from its 248cc, liquid cooled, lightweight, two cylinder engine. The GW250 not only delivers on power but on comfort and style as well.

The striking bodywork provides an aggressive naked statement and is sure to break away from the norm. Its chassis is designed to provide the foundation for a variety of riding styles, while displaying the bike's more visible and prominent features. Whether you're roving city streets or are out on the open road, the GW250's maneuverability and efficient fuel economy is the perfect choice for your daily transportation, and riding fun, needs.

GW250 FEATURES

- Twin cylinder, 248cc liquid-cooled engine has rider-friendly power characteristics to suit a variety of riding conditions.
- Electronic Fuel Injection system (EFI) controls the fuel delivery and the ignition timing based upon the riding conditions to improve fuel economy and reduce emissions.
- The EFI also stabilizes the engine idle and helps provide nearly linear throttle response for clean, exciting performance.
- A six-speed transmission, with gear ratios well mated to the engine output, further improves low- to mid-range power delivery.
- A coupling-type balancer shaft fitted to the engine's crankshaft reduces vibration and enhances rider comfort.
- Dual head-pipes effectively route the exhaust through a pair of long and low chromed mufflers that are balanced to the side of the rear wheel.
- The semi double-cradle chassis is designed to provide abundant support for a variety of riding styles and is the foundation for the visually strong bodywork.
- The well-tuned telescopic front fork soaks up bumps for smooth tracking up front – whether riding rough city streets or faster open roads.
- The handlebar's design and bend were developed to provide a comfortable riding position.
- The 5-way adjustable brake lever allows the rider to position the lever for comfort and confidence.
- Hydraulic disc brakes front and rear provide consistent and controlled braking whether commuting on city streets or roaming the open road.
- Strong three-spoke 17-inch aluminum wheels hold road-grabbing tires that can provide sporting performance through a variety of road conditions.
- The multi-function instrumentation displays a variety of information. In the center, there is large analog tachometer with convenient digital gear position indicator. It's flanked by a digital LCD speedometer, odometer, twin trip meter, clock and fuel gauge readouts, a service indicator, plus LED alert indicators on the left.
- The bright halogen headlight is housed in a prominent nacelle that heads off the bike's angled styling.
- Unique front turn signals built into the fuel tank and radiator side covers create a striking impression.
- The rear turn signals feature clear lenses like the front signals, and are well placed to not interfere with a passenger or luggage.
- The distinctively styled fuel tank holds 3.5 US gallons (13.3 L) of gasoline for excellent riding range.
- The comfortably contoured seat has a low seat height of 30.7 inch (780 mm) and has passenger grab bars for comfortable two-up rides.
- The rear tail cowl finishes off the motorcycle's lines in style as it flows into the grab rails and taillight assembly.
- The taillight assembly uses double pane construction with a clear lens covering the red tail/brake lights.
- 12-month limited warranty.

GW250 SPECIFICATIONS

Engine	248cc, 4-stroke, 2-cylinder, liquid-cooled, SOHC
Fuel System	Electronic fuel injection
Ignition	Electronic ignition (transistorized)
Starter	Electric
Transmission	6-speed constant mesh
Final Drive	Chain
Suspension Front	Telescopic, coil spring, oil damped
Suspension Rear	Swingarm, coil spring, oil damped
Brakes Front	Disc
Brakes Rear	Disc

Tires Front	110/80Z-17 M/C 57H, tubeless
Tires Rear	140/70Z-17 M/C 66H, tubeless
Overall Length	2145 mm (84.4 in)
Overall Width	760 mm (29.9 in)
Wheelbase	1430 mm (56.3 in)
Ground Clearance	165 mm (6.5 in)
Seat Height	780 mm (30.7 in)
Curb Weight	183 kg (403.4 lbs)
Fuel Tank Capacity	13.3 L (3.5 US gal)
