## **Features & Specifications** 2018 Boulevard C90T

## **Key Features**

- 1462cc, 4-stroke, liquid-cooled, SOHC, 45-degree V-Twin engine.
- Standard hard durable saddlebags are designed as part of the bike, not as luggage add-ons.
- Windscreen offers greater protection and wind buffeting is minimized.
- New graphics accentuate classic lines of the fuel tank and body.

## **Engine Features**

- Liquid-cooled, 90 cubic inch (1,462cc) long-stroke V-twin engine delivers the most power and torque in the 1,000 to 1,000cc class. Outstanding low-to-mid range output means smooth acceleration and comfortable long-range cruising characteristics.
- Sculpted engine features polished aluminum and chrome covers that complement the visually striking cylinders with symmetrical cooling fins.
- The aluminum-alloy cylinders are coated with Suzuki Composite Electrochemical Material (SCEM), a coating of nickel-phosphorus-silicon-carbide that reduces friction and increases heat transfer. The result is increased durability and ring seal.
- Each piston's upper compression ring and oil control ring are given a chrome-nitride coating to make them harder and smoother to further reduce friction.
- The four-valve cylinder head with overhead camshafts and dual spark plugs increase combustion efficiency to help ensure seamless throttle response, gutsy low-to-mid range output, better fuel efficiency, and reduced emissions.
- To further reduce mechanical noise, each cylinder head's cam cover is separated from the cam bearing caps, and a rubber gasket is used between the cylinder head and the cam cover.
- Suzuki Dual Throttle Valve (SDTV) induction system is enhanced by the 32-bit engine control unit that instantly delivers the optimum fuel-air mixture and power output. This system - it's the same design used in Suzuki championship-winning GSX-R sportbikes – delivers seamless throttle response while boosting fuel efficiency and delivering strong torque.
- Auto Fast Idle System (AFIS) automatically sets the throttle valve opening during cold engine starts by monitoring coolant temperature.
- To maximize air induction for best power and torque, the VL1500 features a unique system that uses three separate air-cleaner boxes feeding the engine. This air induction system increases engine CHIVAUIS! output without sacrificing style or fuel tank capacity.

- The Suzuki Clutch Assist System (SCAS) reduces the force needed to pull in the clutch lever, so clutch operation remains light. The clutch features back torque limiting clutch system, contributing to smooth down shift operation.
- Chromed and staggered dual-exhaust system mounted on the right side of the engine are tuned for responsive torque delivery providing a deep, rumbling exhaust note.
- A wide-ratio five-speed transmission features a high fifth gear ratio for relaxed highway cruising.
- Low-maintenance shaft drive is clean-running and has minimal torque reaction as it efficiently transmits power to the wide 16-inch rear tire.

#### Chassis Features

- The appeal of classic styling is combined with the benefits of modern performance, with the steeltube frame comfortably carrying the rider and confidently housing the powerful engine.
- The styling incorporates timeless visual statements from cruiser heritage: rich paintwork, glittering chrome and deep front and rear fenders with flared ends.
- The standard windshield provides classic styling with unique chrome garnish with Boulevard emblems and offers full wind protection. The windscreen is positioned and designed to provide ample wind protection at freeway speeds. With subtle Suzuki Boulevard styling, the firmly mounted windscreen offers protection without distraction. Wind buffeting is minimized by allowing just the right amount of air to pass above the headlight.
- Large-capacity, leather-texture saddlebags are standard equipment with Boulevard emblems and convenient twist-lock fasteners provide plenty of storage capacity. Hard saddlebags are made of durable, impact-resistant ABS plastic under stylish covers custom-matched to the leather-grain texture of the seats. They are designed as part of the bike, not as luggage add-ons.
- Additional touring-friendly features include well-positioned footboards, 4.8-gallon fuel tank and shaft drive.
- Design engineers focused on creating an ideal rider's triangle footboards, handlebars and seat
  positions set to deliver classic control with outstanding comfort. The resulting wide handlebar, seat
  and low fuel tank shape add true comfort to the C90T's low-slung, relaxed look.
- Both rider and passenger seats are made for long-range comfort and top-notch control. They allow freedom of movement, accommodate riders of different sizes, and are well cushioned.
- Wide passenger seat makes for comfortable two-up rides. It's stepped location on the rear fender allows passengers to see over the rider's shoulder.
- The design of the link-type rear suspension maintains classic hard-tail look, while keeping the ride low and producing a smooth, ground-hugging ride.
- Stout telescopic front forks deliver generous 5.1 inches of smooth wheel travel and the long 65.9-inch wheelbase provides a smooth, comfortable ride.
- A beefy 16" rear tire and complementary 17" front tire have wide foot-prints and are mounted to bright, spoke-style wheels for a nostalgic cruiser look.
- Hydraulic front and rear disc brakes provide strong, reliable braking performance.
- The multi-function instrument includes a convenient gear-position indicator and a fuel gauge, along with a clock and a trip meter, plus indicator lights for low fuel, turn signals and more.
- Bright multi-reflector headlight. Durable, efficient and compact LED taillight and four bullet-style turn signals.

#### **Additional Features**

- A variety of Genuine Suzuki Accessories for Boulevard owners are available including a large selection of Suzuki logo apparel.
- 12-month limited warranty
- Coverage extensions and additional benefits are available through Suzuki Extended Protection (SEP).
