2018 Burgman 400

AN400AL8

YWW: Pearl Glacier White

Key Features

- Fuel-injected DOHC 399cc, liquid-cooled, single-cylinder engine powers a seamless, CVT automatic transmission
- Stronger low-speed engine response with reduced emissions and better fuel economy
- All new luxurious and sporty bodywork with advanced LED lighting
- Increased frame rigidity and larger, 15-inch front wheel help improve stability and cornering performance
- Spacious underseat storage that can swallow two helmets plus a pair of front compartments with a DC power outlet provide a variety of cargo options

Overview

Already renowned as a premium, feature-rich scooter, the Suzuki Burgman 400 is all-new for 2018. The new Burgman 400 retains the key features that made this luxury scooter popular through the years, while combining improved chassis and engine performance with a sleek new, athletic body. The 2018 Burgman 400 establishes a new convenience and performance standard for mid-sized scooters while maintaining its highly regarded reputation for luxury, quality, comfort and running performance. The result is a more desirable Burgman 400 that truly delivers a winning combination of style, performance, practicality, convenience and riding enjoyment.

Engine Features

- Updated 399cc liquid-cooled, four-stroke, DOHC, single-cylinder, fuel-injected engine produces greater low-to-midrange torque and more powerful performance, even when riding with a passenger.
- DOHC 4-valve arrangement allows ideal positioning of the intake and exhaust valves for superior mechanical advantages and efficient combustion. The benefits can be felt in smooth, instantly available acceleration.

Engine Features (continued)

- The highly efficient new engine, which employs a new, long-life iridium spark plug, takes advantage of the scooter's lower weight to improve fuel economy and extend the riding range of the generous 3.6 gallon fuel tank.
- The refined Suzuki Fuel Injection system with O² feedback plus the Pulsed-secondary AIR-injection (PAIR) system and catalyzer-equipped exhaust boost fuel efficiency and help the Burgman easily achieve emissions compliance.
- The new 5-liter air cleaner assembly is 10% larger to aid throttle response and boost acceleration in stop-and-go traffic. Located under the seat, it has also been designed to emit an exciting intake sound.
- Automatic Idle Speed Control (ISC) system ensures proper engine idle speed at all times.
- The CVT (Continuously Variable Transmission) provides smooth, linear, practically shock-free power delivery for comfortable riding at any speed riding.

Chassis Features

- The Burgman 400's new underbone frame is constructed from large-diameter, thin-wall tubes that result in lower weight and increased rigidity, resulting in improved handling.
- Telescopic 41mm inner-tube front forks with a generous 4.3 inches of wheel travel, and the link-type mono shock absorber rear suspension has adjustable 7-way preload to deliver motorcycle-like handling with exceptional maneuverability.
- A new, larger 15-inch front wheel replaces the 14-inch wheel of the prior model to improve stability and enhance the visual appearance.
- The new front wheel carries a pair of 260mm disc brake rotors while the 13-inch rear wheel has a 210mm hydraulic disc brake for reliable stopping control.
- The standard Antilock Brake System (ABS)* monitors wheel speed, and matches stopping power to available traction. A new compact ABS control unit weighs 1.6 pounds less than the prior model.
- An easy-to-operate, T-handle parking brake lever is located on the dash near the ignition switch, to prevent rear wheel movement when engaged.
- The new upswept windscreen has a cleaner, more compact look from the front or sides while delivering optimum wind protection and a clear view of the road.
- The new bodywork conveys the luxurious, performance nature of the Burgman 400. The slimmer, sportier and more agile look matches the scooter's personality.
- The new nose features sharply styled dual LED headlights with integrated LED position lights and turn signals mounted beneath. The resulting effect is that of a cleaner and lighter front end that is instantly recognizable as belonging to the Suzuki Burgman family.
- The slim new rear deck of the Burgman 400 features independent LED rear combination lamps with the turn signals at their tips. It's a sharply sculpted design that expresses elegance and agility.

- Abundant luggage space includes a 42-liter under-seat storage compartment, large enough for two helmets, plus two front compartments for small personal items. Convenient switchable under-seat lights illuminate the entire storage area.

Helmet sizes and shapes vary, so some helmets may not fit in the under-seat compartment.

- The front bodywork contains two storage compartments; a 2.8-liter compartment on the left and a 3.5-liter compartment on the right that contains a convenient DC power outlet for charging electric devices on the fly.

Chassis Features (continued)

- The new stepped dual seat has nearly an inch thicker padding for more comfort. The width and profile is slimmer to add comfort for both the rider and passenger. The cover features double stitching and accent piping to further extend the look of luxury.
- To increase comfort, especially on longer rides, the seat incorporates a rider's backrest that is adjustable by 0.5-inch or 1-inch fore-and-aft at the press of a lever.
- The combination of the seat changes and floorboard position creates a more upright riding position that is more comfortable and sportier for the rider.
- Cut-away footboards allow the rider to comfortably move and support the scooter at stops and starts.
- Pillion rider footrests provide comfort, letting the passenger feel planted and relaxed, even during extended rides.
- A pair of ergonomically designed grab bars are mounted to the sides of the seat so the passenger can have a good, comfortable grip of the scooter.
- A security gate incorporated in the lower portion of the bodywork allows a chain lock to be passed through a body panel, then around the frame, and then around an immovable object.
- The ignition switch is fitted with a magnetic security cover that opens only with correctly coded key.
- The comprehensive and easy-to-read instruments incorporate an analog speedometer and tachometer plus a LCD display that provides odometer, twin tripmeter, clock, ambient temperature, average fuel consumption, fuel level, and coolant temperature readings. Other colored LED indicators provide turn signal, headlight, freeze and service function alerts.
- The LCD has a programmable oil service indicator to alert the rider when regular maintenance is required.
- The instruments also include the Suzuki Eco Drive Indicator that illuminates when the scooter is being ridden in a fuel efficient manner. This instant feedback helps the rider learn how to maximize the Burgman 400's fuel economy.

Additional Features

- Stylized Suzuki "S" 3-D emblems on the front leg shield and the upper meter panel denotes the quality and sophistication of the brand.
- A variety of Genuine Suzuki Accessories for Burgman owners are available including a large selection of Suzuki logo apparel.
- 12-month limited warranty.
- Longer warranty coverage period and other benefits are available through the Suzuki Extended Protection Plan (SEP).
- For more details, please visit www.suzukicycles.com.

** Depending on road surface conditions, such as wet, loose, or uneven roads, braking distance for an ABS-equipped vehicle may be longer than for a vehicle not equipped with ABS. ABS cannot prevent wheel skidding caused by braking while cornering. Please drive carefully and do not overly rely on ABS.*

Suzuki Motor of America, Inc. makes every effort to present the most current specifications and product features at the time of publication. Ignition coil primary peak voltage		150 V or more	—
Ignition coil resistance	Primary	1.87 – 2.53 Ω	—
	Secondary	18800 – 23200 Ω	

Starting System

Item	Specification	Standard	Limit
Starter motor brush length		7.0 mm (0.28 in)	3.5 mm (0.14 in)
Starter relay resistance		3 – 6 Ω	—
Side-stand switch voltage	ON (Side-stand retracted)	0.4 – 0.6 V	—
	OFF (Side-stand on the ground)	1.4 V or more	

Charging System

Item	Specification		Standard	Limit
Battery leakage current			3 mA or less	—
Regulated voltage	Charging output	At 5000 r/min	14.0 – 15.0 V	—
Generator coil resistance			0.1 – 0.5 Ω	—
Generator no-load voltage	When engine cold	At 5000 r/min	50 V (AC) or more	—
Reaching time	Standard charging		0.9 A for 5 to 10 hours	—
	Fast charging		4 A for 1 hour	
Generator Max. output	At 5000 r/min		Approx. 350 W	—
Battery	Type designation		FTZ9-BS	—
	Capacity		12 V 32.4 kC (9 Ah)/10 HR	

Front Suspension

Item	Specification	Standard	Limit
Front fork inner tube O.D.		41 mm (1.6 in)	—
Front fork oil level	Without spring, inner tube fully compressed	87 mm (3.4 in)	—
Front fork spring free length		344.6 mm (13.57 in)	337 mm (13.3 in)
Front fork oil capacity	Each leg	301 ml (10.18 US oz, 10.59 Imp oz)	—

Rear Suspension

Item	Specification	Standard	Limit
Rear shock absorber spring adjuster		3rd position from softest end	—

Wheels and Tires

Item	Specification		Standard	Limit
Wheel rim runout	Front	Axial & Radial	—	2.0 mm (0.08 in)
	Rear	Axial & Radial	—	2.0 mm (0.08 in)
Wheel axle runout	Front & Rear		—	0.25 mm (0.010 in)
Tire size	Front		120/70-15M/C 56S	—
	Rear		150/70-13M/C 64S	
Tire type	Front		DUNLOP/SCOOTSMART G	—
	Rear		DUNLOP/SCOOTSMART G	
Tire tread depth	Recommend depth	Front	—	1.6 mm (0.062 in)
		Rear	—	2.0 mm (0.078 in)
Cold inflation tire pressure	Solo riding	Front	200 kPa (2.00 kgf/cm ² , 29 psi)	—
		Rear	200 kPa (2.00 kgf/cm ² , 29 psi)	
	Dual riding	Front	200 kPa (2.00 kgf/cm ² , 29 psi)	—
		Rear	250 kPa (2.50 kgf/cm ² , 36 psi)	
Wheel rim size	Front		15 M/C × MT 3.50	—
	Rear		13 M/C × MT 4.00	

Drive Chain / Drive Train / Drive Shaft

Item	Specification	Standard	Limit
Final gear oil capacity	When oil change	180 ml (6.09 US oz, 6.34 Imp oz)	—
	When overhaul	190 ml (6.42 US oz, 6.69 Imp oz)	—

Brake Control System and Diagnosis

Item	Specification	Standard	Limit
Master cylinder bore / piston diameter	Front	Approx. 14.0 mm (0.55 in)	—
	Rear	Approx. 12.7 mm (0.50 in)	

Front Brakes

Item	Specification	Standard	Limit
Front brake disc thickness		4.5 mm (0.18 in)	4.0 mm (0.16 in)
Front brake disc runout		—	0.30 mm (0.012 in)
Front brake caliper cylinder bore / piston diameter		Approx. 25.4 mm (1.00 in)	—

Rear Brakes

Item	Specification	Standard	Limit
Rear brake disc thickness		5.0 mm (0.20 in)	4.5 mm (0.18 in)
Rear brake disc runout		—	0.30 mm (0.012 in)
Rear brake caliper cylinder bore / piston diameter		Approx. 27.0 mm (1.06 in)	—

Brake Lock

Item	Specification	Standard	Limit
Brake lock cable adjusting margin		0 – 1.25 mm (0 – 0.04 in)	—

ABS

Special Tools and Equipment

Fuel / Oil / Fluid / Coolant Recommendation

Fuel

NOTICE

Do not use leaded gasoline. If it is used, the engine and the emission control system will be damaged.

Use unleaded gasoline with an octane rating of 87 AKI or higher.

Unleaded gasoline containing up to 10% ethanol by volume may be used.

Engine Oil

Use engine oils which meet the following requirements.

	Engine oil
API service classification	SG, SH, SJ or SL
JASO T903 standard	MA
Viscosity	SAE 10W-40

If SAE 10W-40 engine oils are not available, select oils of an appropriate viscosity grade according to the following chart.

Suzuki does not recommend the use of engine oil which have an "ENERGY CONSERVING" indication in the API service symbol for any of its motorcycles / ATVs. It can affect the engine life and the clutch performance.

Suzuki recommends the use of SUZUKI PERFORMANCE 4 MOTOR OIL.

Brake Fluid

Specification and classification: DOT 4

▲ WARNING

Since the brake system of this motorcycle is filled with a glycol-based brake fluid by the manufacturer, do not use or mix different types of fluid such as silicone-based and petroleum-based fluid for refilling the system, otherwise serious damage will result.

Do not use any brake fluid taken from old or used or unsealed containers.

Never reuse brake fluid left over from a previous servicing, which has been stored for a long period.

Engine Coolant

Suzuki recommends the use of SUZUKI LONG LIFE COOLANT or SUZUKI SUPER LONG LIFE COOLANT.

If SUZUKI COOLANT is not available, use an anti-freeze/engine coolant compatible with an aluminum radiator, mixed with distilled water only.

For SUZUKI LONG LIFE COOLANT

NOTICE

- Use a high quality ethylene glycol base anti-freeze, mixed with distilled water. Do not mix an alcohol base anti-freeze and different brands of anti-freeze.
- Do not put in more than 60% anti-freeze or less than 50%. (Refer to Fig. 1 and 2.)

The 50:50 mixture of distilled water and ethylene glycol anti-freeze will provide the optimum corrosion protection and excellent heat protection, and will protect the cooling system from freezing at temperatures above -31°C (-24°F).

If the vehicle is to be exposed to temperatures below -31°C (-24°F), this mixing ratio should be increased up to 55% or 60% according to the figure.

Anti-freeze Proportioning Chart

Anti-freeze density	Freezing point
50%	-31°C (-24°F)
55%	-40°C (-40°F)
60%	-55°C (-67°F)

Fig.1: Engine coolant density-freezing point curve

Fig.2: Engine coolant density-boiling point curve

For SUZUKI SUPER LONG LIFE COOLANT

NOTICE

- Ethanol or methanol base coolant or water alone should not be used in cooling system at any time as damage to cooling system could occur.
- Do not mix the distilled water, SUZUKI LONG LIFE COOLANT (coolant color: Green) or equivalent.

SUZUKI SUPER LONG LIFE COOLANT will provide the optimum corrosion protection and excellent heat protection, and will protect the cooling system from freezing at temperatures above $-36\text{ }^{\circ}\text{C}$ ($-33\text{ }^{\circ}\text{F}$).

Anti-freeze concentration table

Anti-freeze density	Freezing point
50%	$-36\text{ }^{\circ}\text{C}$ ($-33\text{ }^{\circ}\text{F}$)

Water for mixing

Use distilled water only. Water other than distilled water can corrode and clog the aluminum radiator. For engine coolant mixture information, refer to “Engine Coolant”.

NOTICE

Mixing of anti-freeze/engine coolant should be limited to 60%. Mixing beyond it would reduce its efficiency. If the anti-freeze/engine coolant mixing ratio is below 50%, rust inhabiting performance is greatly reduced. Be sure to mix it above 50% even though the atmospheric temperature does not go down to the freezing point.

Anti-freeze / Engine coolant

The engine coolant perform as a corrosion and rust inhibitor as well as anti-freeze. Therefore, the engine coolant should be used at all times even though the atmospheric temperature in your area does not go down to freezing point. Suzuki recommends the use of SUZUKI COOLANT anti-freeze/engine coolant. If this is not available, use an equivalent which is compatible with an aluminum radiator.

Front Fork Oil

Use SUZUKI FORK OIL G-10.

Fork oil 99000-99044-10G (SUZUKI FORK OIL G-10)
