## **Features & Specifications** 2019 KingQuad 750AXi Power Steering SE

## **Key Points**

- New edgy and dynamic styling with Solid Special White bodywork
- · Powerful, emissions-compliant four-stroke engine with refined EFI tuning
- Updated Quadmatic<sup>™</sup> transmission delivers stronger and smoother acceleration
- Select 2WD, 4WD or 4WD differential-lock on the fly with a push of a button
- New frame and other changes boost towing capacity to 1322 pounds
- · New lightweight, cast-aluminum wheels

#### Overview

The KingQuad 750AXi Power Steering SE is not just a new ATV, it's a new KingQuad ATV. Suzuki, the inventor of the four-wheel ATV, took the world's best sports-utility quad and made it better and more capable than ever. The legacy of the iconic KingQuad has a new and exciting chapter and is ready for you to join the narrative. The new 2019 KingQuad is easier to ride on any terrain thanks to updates in several key areas:

Styling All-new styling & body-work design, the Solid Special White SE is a higher trim level KingQuad with new, cast-aluminum wheels.

Increased towing capacity (up to 1322 lbs.) from a new, stronger frame, new gascharged shock absorbers, larger rear stabilizer bar with more compliant bushings, refined front and rear brakes, plus easier rider control via updated steering calibration and a higher-capacity electronic power steering system.

Updated engine delivers more power and is matched to a updated Quadmatic™ CVT transmission for stronger and smoother acceleration and enhanced engine braking. New piston oil-jet cooling for increased durablity and full emissions compliance (new California model).

New handlebar-mounted lights and fender-mounted twin headlights with a new, lowdraw LED taillight, plus a new LCD instrument panel that is easier to read with programmable service reminder, and a fender-mounted power outlet.

Accessories An expanded range of Genuine Suzuki Accessories lets you set up your KingQuad for AIVAUS! Any Mission.

## **Engine Features**

- The powerful 722cc, DOHC, single-cylinder, liquid-cooled, four-stroke engine has new, refined tuning to deliver increased low-to-mid range torque as well as increased high-rpm power.
- The engine's oil pump size and capacity is increased to increase flow and to supply the new piston oil jet system to increase engine durability.
- The cylinder and head are canted forward for a low center of gravity resulting in reduced engine height and lower seat height. High-mount air intake avoids water and debris.
- The 4-valve cylinder head has large 36mm intake valves and straight ports for superb cylinder charging efficiency. A sportbike-derived chain-and-gear camshaft drive system creates a compact cylinder head.
- A lightweight aluminum cylinder uses SCEM (Suzuki Composite Electrochemical Material) coating for excellent heat transfer and ring sealing resulting in superb combustion chamber efficiency.
- The engine also features dual balancer shafts for smooth operation.
- Advanced Suzuki Fuel Injection improves throttle response and fuel efficiency, while delivering power consistently across the full rev-range, and improves engine starting in all conditions.
- The new KingQuad easily achieves US emissions compliance, including California models that conform to the state's stringent evaporative emissions standard (eligible for green sticker registration).
- High capacity aluminum radiator with large diameter, thermostatically controlled cooling fan provides stable engine operating temperature.

#### **Transmission Features**

- The QuadMatic™ CVT-type automatic transmission provides versatility and convenience with a fender-mounted gate-type shifter for high/low range selection. Its advanced engine-braking system minimizes free-wheeling with the throttle off and helps control the vehicle during steep descents.
- New CVT spring and weight calibration provides smoother and stronger acceleration from stops and matches the engine's performance to the chassis' increased towing capacity.
- The new CVT tuning also improves engine braking function to boost rider confidence and comfort during downhill riding.
- A compact torque-sensing limited-slip front differential offers potent traction plus light steering. A
  differential-lock system provides serious four-wheel-drive traction.
- Handlebar-mounted push-button controls permit easy selection between 2WD, 4WD and differential-lock 4WD. An override button on the left handlebar can be used to override the normal speed limiter when stuck in the mud.

#### Chassis Features

- To increase rider comfort, make the ATV easier to ride on any terrain and increase towing capacity the KingQuad's frame is new with thicker frame tubes and redesigned brackets in key areas.
- The base steering characteristics are now tuned to an "under-steer" condition for reduced effort and tighter turning in tight conditions. The ATV is fitted with higher, more comfortable handlebars.
- The KingQuad's new, advanced electric power steering system has higher capacity than ever before for significantly reduced steering effort that also damps vibration and jolts to the rider.
- The bold, new bodywork features high-clearance fenders that offer great protection for the rider from flying debris. Refined panels simplify maintenance needs, such as oil level checks, fuel and air filter service.
- Independent double A-arm front suspension (6.7 inches of wheel travel) includes new large diameter, gas-charged shock absorbers with 5-way spring preload adjustment.
- Fully independent, A-arm/l-beam rear suspension with 7.7 inches of wheel travel includes new large diameter, gas-charged shock absorbers with 5-way spring preload adjustment.
- A new, larger diameter rear stabilizer bar with more compliant bushings helps control body movement while reducing shocks to the rider.

#### **Chassis Features** (continued)

- The dual front disc brakes have new brake pad material, fluid lines and lever to optimize braking.
- The sealed, multi-plate rear brake system features a new foot brake lever ratio for enhanced rider control. The rear brake's clutch-type design provides high durability, reduced unsprung weight and low-maintenance.
- High traction 25-inch CARLISLE tires are mounted on new, lightweight, cast aluminum wheels.
- Suzuki's plush T-shaped seat delivers rider mobility during spirited or difficult terrain riding.
- Polyethylene skid plates provide protection with minimal resistance over rocks and rough terrain.
   Durable plastic guards protect the front and rear half shafts.

#### **Utility/Convenience Features**

- The new 35W handlebar-mounted headlight illuminates the trail in the direction you are steering. Dual 35W headlights (with high and low settings) are part of the new, distinctive KingQuad bodywork.
- A new, low-draw and bright LED tail light helps make the ATV visible in dark conditions while conserving power.
- A new receiver-type trailer hitch mount makes it easy to select the type of equipment you want to move with the KingQuad's higher towing capacity (up to 1322 pounds).
- Winch-ready mounts and wire conduit makes winch installation simple.
- A new, fully redesigned multi-function instrument panel has improved appearance, visibility and provides service reminders based on running time or mileage. The instrumentation includes LCD readouts for speedometer, odometer, twin tripmeter, hour meter, clock, fuel level, driving range and drive mode. LED indicators for high, low, neutral, reverse and 2WD/4WD and differential-locked 4WD. LED cautions for fuel injection and engine temperature.
- High-output, three-phase charging system feeds an 18-amp maintenance-free battery for abundant power for easy starting and accessory use. A sealed 12V accessory outlet is standard.
- The large 4.6 gallon (17.5 L) fuel tank is positioned for a low center-of-gravity. It includes a vacuum-operated petcock and a ratchet-style filler cap (which prevents over tightening so it can be easily unscrewed for refilling).
- A new, large 4.0 liter storage compartment is centrally added to the rear of the ATV adjacent to the
  existing 4.0 liter left-side compartment to increase cargo capacity. The 2.8 liter water resistant front
  storage compartment includes an easy access screw-on cap.
- The rugged steel-tube cargo racks have wrinkle paint finish for durability and scratch resistance.
- Full floorboards with integrated raised footpegs provide protection.

#### **Additional Features**

- A variety of Suzuki Genuine Accessories are available including winches, windshield, front and rear bumpers, a new quick-release snow plow, aluminum skid pans, utility box and more.
- 12-month limited warranty

## **Special Tools and Equipment**

## Fuel / Oil / Fluid / Coolant Recommendation BENK34K20308001

Fuel

#### **NOTICE**

Do not use leaded gasoline. If it is used, the engine and the emission control system will be damaged.

Use unleaded gasoline with an octane rating of 87 AKI or higher.

Unleaded gasoline containing up to 10% ethanol by volume may be used.

#### **Engine Oil**

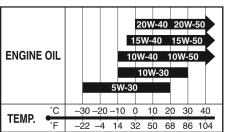

Use Suzuki genuine engine oil or equivalent. If Suzuki genuine engine oil is not available, select a proper engine oil according to the following guideline.

	Engine oil
API service	SG, SH, SJ, SL, SM or SN
classification	3G, 3H, 33, 3L, 3M 0H 3N
JASO T903 standard	MA
Viscosity	SAE 10W-40

If SAE 10W-40 engine oils are not available, select oils of an appropriate viscosity grade according to the following chart.

#### **NOTICE**

When 5W-30 or 10W-30 engine oil is used, use only SG, SH, SJ, SL API classification. If there are not used API classification engine oils, the engine will be damaged.

IK34K2030001-01

Suzuki does not recommend the use of engine oils which have an "ENERGY CONSERVING" or "RESOURCE CONSERVING" indication in the API service symbol for any of its motorcycles / ATVs.

ID26J1030005-02

Suzuki recommends the use of ECSTAR or SUZUKI PERFORMANCE 4 MOTOR OIL.

#### **Brake Fluid**

Specification and classification: DOT 4

#### **▲ WARNING**

Since the brake system of this vehicle is filled with a glycol-based brake fluid by the manufacturer, do not use or mix different types of fluid such as silicone-based and petroleum-based fluid for refilling the system, otherwise serious damage will result.

Do not use any brake fluid taken from old or used or unsealed containers.

Never reuse brake fluid left over from a previous servicing, which has been stored for a long period.

#### **Engine Coolant**

Suzuki recommends the use of SUZUKI LONG LIFE COOLANT.

## Coolant 99000–99032–12X (SUZUKI LONG LIFE COOLANT (GREEN))

If SUZUKI COOLANT is not available, use an antifreeze/engine coolant compatible with an aluminum radiator, mixed with distilled water only.

#### **NOTICE**

- Use a high quality ethylene glycol base anti-freeze, mixed with distilled water. Do not mix an alcohol base anti-freeze and different brands of anti-freeze.
- Do not put in more than 60% anti-freeze or less than 50%. (Refer to Fig. 1 and 2.)

The 50:50 mixture of distilled water and ethylene glycol anti-freeze will provide the optimum corrosion protection and excellent heat protection, and will protect the cooling system from freezing at temperatures above –31 °C (–24 °F).

If the vehicle is to be exposed to temperatures below - 31 °C (-24 °F), this mixing ratio should be increased up to 55% or 60% according to the figure.

#### **Anti-freeze Proportioning Chart**

Anti-freeze density	Freezing point
50%	–31 °C (–24 °F)
55%	–40 °C (–40 °F)
60%	–55 °C (–67 °F)

Fig.1: Engine coolant density-freezing point curve

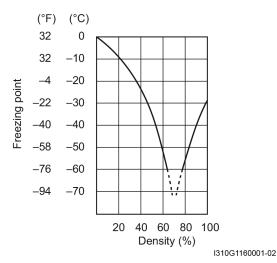

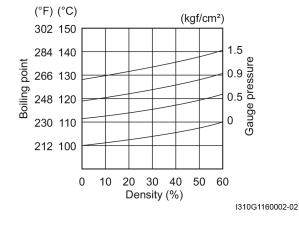

Fig.2: Engine coolant density-boiling point curve

#### Water for mixing

Use distilled water only. Water other than distilled water can corrode and clog the aluminum radiator. For engine coolant mixture information, refer to "Engine Coolant" (Page 0C-12).

#### **NOTICE**

Mixing of anti-freeze/engine coolant should be limited to 60%. Mixing beyond it would reduce its efficiency. If the anti-freeze/engine coolant mixing ratio is below 50%, rust inhabiting performance is greatly reduced. Be sure to mix it above 50% even though the atmospheric temperature does not go down to the freezing point.

#### Anti-freeze / Engine coolant

The engine coolant perform as a corrosion and rust inhibitor as well as anti-freeze. Therefore, the engine coolant should be used at all times even though the atmospheric temperature in your area does not go down to freezing point.

Suzuki recommends the use of SUZUKI COOLANT antifreeze/engine coolant. If this is not available, use an equivalent which is compatible with an aluminum radiator.

#### Front Differential Gear Oil

Use a SAE 90 hypoid gear oil which is rated GL-5 under the API classification system. If you normally operate the vehicle where ambient temperature is below 0 °C (32 °F), use a SAE 80 hypoid gear oil.

#### Rear Final Gear Oil

Use Mobil® MOBIFLUID 424 or equivalent.

Rear final gear oil (Mobil® MOBILFLUID 424 or equivalent)
